Tiger Profiles & Insulation awarded first gold GAIA award for SolaSteel

The evening of the 5th of November marked a prestigious cause for celebration at the Westin Hotel in Dubai, for the most prominent members of the construction industry in the region.

Contractors, consultants, engineers, architects and the industry' suppliers were witnesses to the announcement of the award winners of several categories. This year the Construction Awards included a new category - the GAIA award for products that prove to reduce the impact on the environment. Amongst hundreds of applications for this very highly regard award were Tiger Profiles & Insulation LLC, exclusive distributors to the Middle East, Asia and Africa of SolaCoat and Solasteel.

The gold award was ceremoniously presented by Mr. Simon Mellor, Vice President of DMG International to Mr. Bernard Nasr, Executive Director of Tiger Profiles & Insulation LLC, who was accompanied by the Managing Director of CoolShield International, the Australian manufacturers of the award winning product. The gold winning product, SolaSteel, is a heat reflecting paint hat is applied on to metal coils before they are manufactured into profiles and panels for the cladding industry.

Two silver awards also went to Tiger Profiles & Insulation LLC for their exclusively distributed SolaCoat heat reflecting coating and the SolaCoat Pavement heat reflecting and anti-slippery coating.

About Tiger Profiles & Insulation LLC:

Tiger Profiles and Insulation LLC, TPI, was established in 1994 as a member of the prestigious Tiger Group of Companies established in the United Arab Emirates in 1968. TPI is a primary source for the design and supply of the cold formed and insulated metal building components for roofs, walls, false ceilings and floor decks. A one-stop-shop for construction related metal requirements; TPI has always aimed at ensuring that clients are always given the highest priority.

We at TPI manufacture, supply and install: cladding materials, roof panels, wall panels, floor decking panels, standing seams, steel and aluminum profiled sheeting, partitioning, composite sandwich panels, cold store panels, standing seam systems, cold roll forming, fasteners, bolts, nuts and a range of cladding and profile materials and products. Besides maintaining our existing product line, and constantly seeking innovative

upgrades to our existing products, we have developed, and recently introduced, together with our principals, Solacoat; a new option to the insulation of our panels.

Solacoat, originally an Australian product, represented by our Australian principles, Coolshield International, is a revolutionary, water-based paint, that provides a Radiant Barrier Insulation coating that reduces temperature. Solacoat is the most efficient and most cost effective form of heat insulation commercially available today. It is a waterborne acrylic emulsion based product, which has a special membrane additive which aids in rejecting of the infra red rays from the sun.

As Exclusive Distributors of Solacoat in the Middle East, Africa and Asia, we offer our cladding clients the option of applying the Gold GAIA Award winning coating - SolaSteel - to a single skin panel when clients are in need of keeping the heat out of areas that are not air-conditioned, and it can be applied, in a number of forms, to a PU sandwich panel to provide maximum heat insulation from external heat, and the highest levels of solar reflectivity while providing maximum efficiency in keeping the air-conditioned air inside the insulated area.

Solacoat is capable of catering to a range of needs and solar reflectivity requirements, and is guaranteed to accommodate the hottest sun and the brightest rays. By winning the Gold and Silver Awards, SolaCoat and SolaSteel have become further asserted as certified Green Products that comply with the Green Laws of the UAE.
