About Tiger Profiles & Insulation

Tiger Profiles and Insulation LLC, TPI, was established in 1993 as a member of the Tiger Group of Companies. TPI is a primary and comprehensive source for the design and supply of the cold formed and insulated metal building components for roofs, walls, false ceilings and floor decks. A one-stop-shop for construction related metal requirements; TPI has always aimed at ensuring that clients are always given the highest priority.

The products manufactured by Tiger Profiles & Insulation cover a comprehensive array of products that include a range of profiles, panels

and roofing solutions that are custom made to individual clients' needs. These encompass a selection of the most technically advanced roof and wall panels, floor decking panels, steel and aluminum profiled sheeting, partitioning, composite sandwich panels, cold store panels, standing seam system (known as T-Seam®), concealed fastener wall panels and pre-insulated partitions complemented by a full line of related cladding accessories.

In addition, TPI is the Sole Regional Distributor in the Middle East, Asia and Africa of the Australian SolaSteel and Solacoat GAIA Big 5 2008 Award Winning Heat Reflecting Products.

TPI's commitment to quality and the environment is translated into its three internationally recognized quality certificates: the ISO 9001 Quality Management Standards, the ISO 14001 Environmental Management Standards and the OHSAS 18001 Health and Safety Management Standards. TPI is a member of the US Green Building Council (USGBC), and the Emirates Environmental Group.
